Introduction

Research and innovations are considered to be the cardinal factors for knowledge creation, which is essential for the prosperity of human civilization. These are the major driving forces that provide input for the scientific discovery and pave the way for further development. The universities are primarily considered to be breeding ground for training and grooming the future talents. Over the years research has made rapid strides in all the fields of knowledge. But all is not well with research as the quality of researches in our university department has projected a declining trend. Several instrumental factors do not encourage the meritorious students to opt research as a career option. In nutshell our higher learning institutions have failed in **Creating Conducive Research Culture**. At present, in most of the universities, except a few disciplines, there is no adequate provision of training on research methodology. On the whole, the young researchers lack adequate skill to carry out quality

researches which raises a grave concern. Thus, a pressing need has been felt for adopting capacity building measures that may help overcoming the situation.

The present Workshop is an endeavour in this direction. AIU has taken an initiative of organizing such kind of workshop on regular basis. This Workshop intends to provide an opportunity to the research scholars, young faculty members engaged in Research to upgrade their knowledge on research methodology and enrich their skills of conducting quality researches as well as.
